

AIRBORNE DUST CONTROL by

DUSTSET 2020 is a non-polymer, super concentrate (1:4000 mixing ratio) with anti-foaming technology, increases water spray dust control effectiveness by up to 50%

DUSTSET 2020, can be mixed while filling your tank, but unlike other brands, the anti-foaming technology allows the concentrate to be pumped directly into the water pressure line during application and adjusted on the go to suit your needs.

Note: 1000-L of DUSTSET can last up to 4,000,000-L of water

DUSTSET 2020 will saturate roads and stockpiles up to a depth of 50-mm or more and will retain a moist substrata.

DUSTSET 2020 does not require the road to be preconditioned by scarping, ploughing and improves the compaction rate of haul roads.

DUSTSET 2020 Concentrate is:

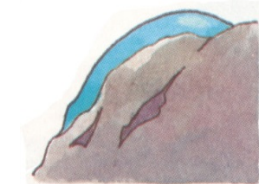

- ✓ Non hazardous
- ✓ Non flammable
- ✓ Biodegradable
- ✓ pH Neutral
- ✓ Environment and user friendly
- ✓ Low hazard to animals and plants
