

## AIRBORNE DUST CONTROL by

DUSTSET 2020 is a non-polymer, super concentrate (1:4000 mixing ratio) with anti-foaming technology, increases water spray dust control effectiveness by up to 50%

DUSTSET 2020, can be pumped directly into the water supply line of your Crusher or Longwall without foaming of the mixture. The dosing pump can be setup to start and stop with water demand automating the application of the product.

**Note: 1000-L of DUSTSET can last up to 4,000,000-L of water**

DUSTSET 2020 will increase cutter and crusher spray effectiveness reducing airborne dust without increasing water spray rates.

DUSTSET 2020 may not require any modification to your equipment and the application can be started and stopped to suit the level of dust control required.

### DUSTSET 2020 Concentrate is:

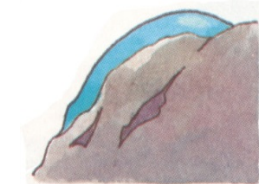

- ✓ Non hazardous
- ✓ Non flammable
- ✓ Biodegradable
- ✓ pH Neutral
- ✓ Environment and user friendly
- ✓ Low hazard to animals and plants

### Water

High surface tension  
Water beading

### Water with DUSTSET 2020

Low surface tension  
Water wrapping
